

TECHNICAL INFORMATION

FORAGE SPEC SHEET

PROGRESS

Outstanding Orchardgrass

TESTED &
SUPERIOR
VARIETY

PROGRESS is an early to medium maturity variety with outstanding resistance to Stripe Rust disease. **PROGRESS** was tested in British Columbia as Dana and in the Fraser Valley showed the best resistance to Stripe Rust compared to twenty-nine other orchardgrass cultivars. In the same trial, **PROGRESS** had a **HIGH** dry matter yield with **TOP** protein yield.

EFFECTIVENESS:

PROGRESS Orchardgrass is a valuable component in a forage mix - with or without other orchardgrass varieties - **contributing maturity variation, disease**

resistance and high forage yield. *By using varieties with slightly differing maturity times, the risk of harvesting low quality forage can be reduced.*

RECOMMENDED

USES:

Recommended uses include:

- Silage
- Hay
- Grazing.

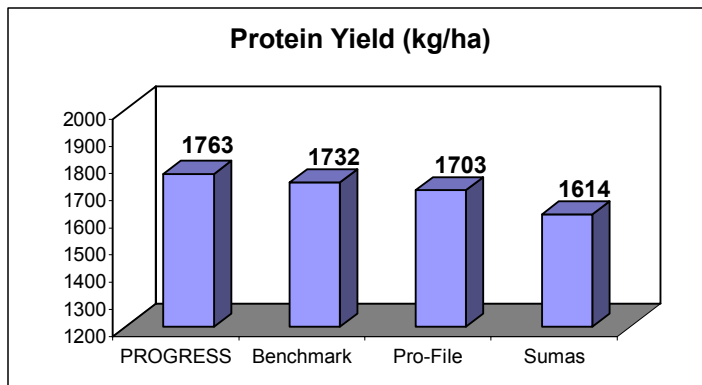

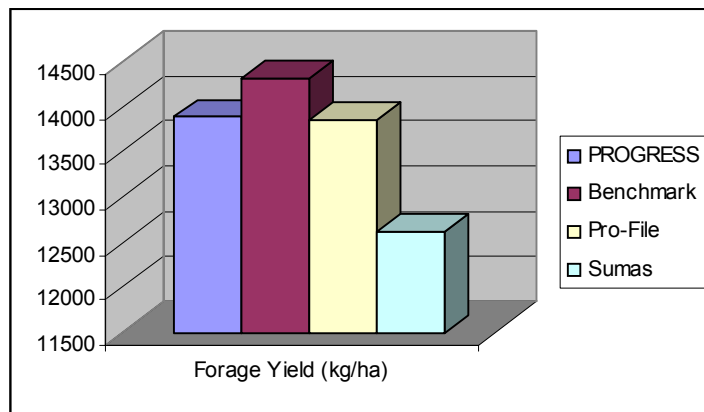

ATTRIBUTES:

Attributes include:

- Early-Medium maturity
- Outstanding Stripe Rust disease resistance
- Produces high yield - both dry matter and quality.

AVAILABILITY:

PROGRESS Orchardgrass is an **improved variety** available in BC from your local Quality Seeds West dealer or representative, or directly from our Head Office in Cloverdale, BC.
